

Noise-cancelling microphone

Flexible to use

For all-day wearing and reliability **SUPRAPLUS®**

The Plantronics SupraPlus® headset family sets new standards in all-day comfort and reliability for telephone professionals. SupraPlus offers monaural or binaural models, with either voice tube or noise-canceling microphones.

plantronics®

Plantronics SupraPlus®

Plantronics SupraPlus® headset sets the standard in audio performance. SupraPlus is UC ready with wideband technology that ensures great incoming call quality. The new Microphone boom is longer and sleeker; improving user positioning for better outgoing call quality and the ultra noise-cancelling microphone provides exceptional noise reduction. All this enables much clearer conversations and less fatigue for office and contact centre workers. Ergonomically designed, and available in monaural or binaural versions; voice tube; noise-cancelling, the versatile SupraPlus is the headset of choice in offices and contact centres around the world.

WIDEBAND AUDIO

The SupraPlus® Monaural and Binaural noise-cancelling models have all the features of standard SupraPlus® headsets, but also use noise-cancelling microphones which eliminates up to 75% of all background noise. As with all Plantronics office headsets, the SupraPlus® features Plantronics patented Sound Guard Plus and Call Clarity technology. Its easy to use Quick Disconnect feature places the caller on hold, while allowing users to leave their desk without removing their headset. Its optional noise-cancelling feature is ideal for use in situations where background noise interferes with clear

If you are amongst the many people who now make lengthy conference calls, the SupraPlus® Wireless headset from Plantronics means you can simultaneously write or type notes, access papers, or even just relax and enjoy your coffee, whilst talking business.
